

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

CURRENT STATE SUMMARIES.

Telegraphic Reports for Week Ended August 7, 1920.

These reports are preliminary and the figures are subject to change when later returns are received by the State health officers.

SUMMARY OF CASES REPORTED MONTHLY BY STATES.

Tables showing, by counties, the reported cases of cerebrospinal meningitis, influenza, malaria, pellagra, poliomyelitis, smallpox, and typhoid fever are published under the names of these diseases. (See names of these and other diseases in the table of contents.)

The following monthly State reports include only those which were received during the current week. These reports appear each week as received:

State.	Cerebrospinal meningitis.	Diphtheria.	Influenza.	Malaria.	Measles.	Pellagra.	Poliomyelitis.	Scarlet fever.	Smallpox.	Typhoid fever.
1920.										
Ohio (June).....	11	290	24	18	2,918		5	740	602	111
Texas (May).....		52	70	83	226	14		56	453	42
Texas (June).....	4	43		1,715	166	21		29	230	114

RECIPROCAL NOTIFICATION.

Connecticut—July, 1920.

Cases of communicable diseases referred during July, 1920, to other State health departments by department of health of the State of Connecticut.

Diseases and locality of notification.	Referred to health authority of—	Why referred.
Diphtheria:		
Greenwich, Conn.....	State Board of Health, Concord, N. H.	Onset of disease while in camp at Petersboro, N. H. Patient returned to her home in Greenwich.
Marlborough, Conn.....	State Department of Health, Albany, N. Y.	Onset of disease 2 days after patient's leaving New York City.
Typhoid fever:		
East Granby, Conn.....	State Board of Health, Jacksonville, Fla.	Patient arrived ill from Lakeland, Fla.
Washington, Conn.....	State Department of Health, Albany, N. Y.	Onset of disease 10 days after patient's leaving her home in New York City.
Greenwich, Conn.....	do.....	Patient visited Rye, N. Y., 2 weeks prior to onset of disease.
Waterbury, Conn.....	do.....	Onset of disease 2 days after patient's arriving on S. S. Philadelphia at port of New York.
Stamford, Conn.....	Massachusetts Department of Public Health, Boston, Mass.	Onset of disease 3 days after patient's arriving on S. S. Cretic at Boston, Mass.

ANTHRAX.

New Brunswick, N. J., and Philadelphia, Pa.

During the week ended July 24, 1920, one case of anthrax was reported at New Brunswick, N. J., and two cases were reported at Philadelphia, Pa.

SMALLPOX—Continued.

City Reports for Week Ended July 24, 1920.

The column headed "Average cases" gives the average number of cases reported during the corresponding week of previous years for which data are available. The years used are 1915 to 1919, inclusive, but in many instances the information is not available for the full five years. In these cases the average includes from one to four years.
